

# Term 4- Sustainability in our school

Term 4 has been a big term for Sustainability in our school. The Year 5/6's have taken an active role in sustainability initiatives around the school. These initiatives include maintaining the gardens, composting and our own veggie garden which are well underway, involving students from all year levels.

Over the last term our veggie garden has flourished with a mixture of herbs, vegetables and plants. Some of these include mint, tomatoes, chives and lavender. We have found some interesting things in our veggie garden which we can further investigate. Could they be caterpillar eggs?

Students in year 5 and 6 have begun updating the LGPS blog on CERES Sustainability Hub. Follow the link to find out what has been happening around the school.

Thank you to the entire school community for all your support. We look forward to a fresh, healthy and eco-friendly start to the new-year to continue our great work.

Look how much our veggies have grown!

Our first tomato!
